

# Come for the Quality, Stay for the Care.

Manufactured to the highest standards, UltraCrete's market-leading highway maintenance products are used globally on a daily basis.

UltraCrete's loyal customers may have been initially drawn to the company's high-quality products, but they have remained long-term clients due to the exceptional care provided by the brand's dedicated team.

When asked about their partnership with UltraCrete, specialist civil engineering and underground drainage product experts, shared: **"We use UltraCrete products because they are easy to sell given that they do what it says on the tin. We have regular visits from our Area Sales Manager, James Barham, who is always happy to assist us with everything we throw at him."**

The Sales Manager continued: **"The quality of the products are second to none, but the people are UltraCrete's biggest asset. The team are always willing to help us, whether it be an urgent requirement of stock or an unusual order, they always accommodate us and get the results we need. They really are a pleasure to work with. Thank you for all your assistance over the past year."**

UltraCrete's market-leading product portfolio is made up of PAS and HAPAS approved reinstatement materials, access frame installation aid, bedding mortars, high specification concretes, hot and cold

surfacing materials, construction chemicals and ancillary product for a smooth-running, first time permanent installation every time.
