

UltraCrete transforms customer challenges into success

MATERIALS USED: INSTANT ROAD REPAIR, TOUGH PATCH, PY4/5, QC10 & INSTAGRIP

Boasting over 20 years' experience delivering essential infrastructure services, a leading utility company recognises the importance of collaborating with like-minded partners to overcome challenges to achieve success.

On using UltraCrete's Instant Road Repair and Tough Patch asphalts, PY4/5 bedding mortar, QC10 rapid strength concrete and Instagrip anti-skid patch repair, an Operations Manager shared. "I have personally been using these products for over 10 years and have always liked the consistency of the products and the ease of using them. The feedback is also good from all the teams that use UltraCrete products out on site."

When asked the secret of his long and successful partnership with UltraCrete, he continued: "The UltraCrete team are always looking at ways to move forward and improve, and they actually listen to the feedback we give them and collaborate with us when required. We are always invited to trial new products and services, and their team is always on hand to give us advice whenever we need it."

UltraCrete's market-leading product portfolio is made up of PAS and HAPAS approved reinstatement materials, access frame installation aid, bedding

mortars, high specification concretes, hot and cold surfacing materials, construction chemicals and ancillary product for a smooth-running, first time permanent installation every time.
